

1. Instructions Solubility Assignment (6 marks)

Make a short presentation to include the following information. (Use powtoons, haiku deck, prezzi, or pp)

1. Find a useful/interesting chemical reaction in our world that involves solid precipitates and aqueous solutions (eg. Medicine, engineering, environmental, household, automobiles, planes, etc.....) and explain what it is used for.
2. Write a balanced chemical equation for the whole reaction or at least part of the reaction. Include the states of the reaction (solid, liquid, gas, aq)
3. Find a picture of the reaction and embed the picture.
4. Find a video of this reaction and include the link.
5. State the most interesting fact or a fun fact about the reaction that you found?
6. Include all REFERENCES!
